

e-Crafter Pick-up

Dropside

Tipper

The basis of this vehicle is the original Volkswagen e-Crafter Panel Van L3H3. The complete electric drivetrain system remains fully original as it is designed and manufactured by Volkswagen AG. The warranty on the vehicle drivetrain is the original Volkswagen warranty. The e-Crafter pick-up has a Letter of No Objection from Volkswagen AG. The vehicle can be registered anywhere in Europe through a second stage European Type Approval.

The market need of electrically powered commercial vehicles is undeniable. In the very near future a large part of the commercial vehicle market will consist of electric light commercial vehicles. The closure of inner cities for fossil motor vehicles and tax incentives are important elements in the development of this market. Apart from the e-Crafter Van there is also a need for a big-range "chassis cabin" variant with a considerable load capacity (around 800 kg). The Volkswagen e-Crafter pick-up is the ideal vehicle for these customers.

The vehicle weight of the Volkswagen e-Crafter changes through the conversion of the vehicle to a pick-up. After the conversion to a pick-up with Tipper ¹ (storage drawers under the floor included) the new Gross Vehicle Weight is 2758 kg.

¹ Features include an emergency stop button and a fall arrest system.

Specifications of the e-Crafter pick-up with open cargo body:

- Wheelbase: 3640 mm,
- Loadfloor: aluminium welded panels,
- Side boards: aluminium 300 mm high, foldable
